

Standard Operating Procedure (SOP_002)

Title: Sample Handling and Storage

Version: 1.0

Effective Date: 2025-01-01

Purpose:

To describe procedures for receiving, labeling, and storing laboratory samples to maintain integrity and traceability.

Scope:

Applicable to all staff handling biological or chemical samples.

Procedure:

1. Record incoming samples in the Sample Log Book with unique ID and description.
2. Apply a barcode or label with sample ID, date, and handler initials.
3. Store samples in designated temperature-controlled units (ambient, 4°C, -20°C, -80°C).
4. Do not store incompatible samples together.
5. Discard expired or compromised samples following waste disposal SOP_001.

Notes:

Proper labeling and segregation prevent cross-contamination and data loss.
